Versión	Fecha	Descripción
1.0	02/03/2024	Creación del documento
1.1	08/03/2024	Entregable D02

CONTENIDOS

DO2

- **TAREA 02:**

"A project aggregates several user stories elicited by the same manager. The system must store the following data about them: a code (pattern "[A-Z]{3}-[0-9]{4}", not blank, unique), a title (not blank, shorter than 76 characters), an abstract (not blank, shorter than 101 characters), an indication on whether it has fatal errors, e.g., panics, a cost (positive or nought), and an optional link with further information. Projects containing fatal errors must be rejected by the system."

- **TAREA 03:**

"A user story is a document that a manager uses to represent the smallest unit of work in a project. The system must store the following data about them: a title (not blank, shorter than 76 characters), a description (not blank, shorter than 101 characters), an estimated cost (in hours, positive, not nought), the acceptance criteria (not blank, shorter than 101 characters), a priority ("Must", "Should", "Could", or "Won't"), and an optional link with further information."

- **TAREA 04:**

"The system must handle manager dashboards with the following data: total number of "must", "should", "could", and "won't" user stories; average, deviation, minimum, and maximum estimated cost of the user stories; average, deviation, minimum, and maximum cost of the projects."

- **TAREA 05:**

"Produce assorted sample data to test your application informally. The data must include two manager accounts with credentials "manager1/manager1" and "manager2/manager2".

- **TAREA 13:**

"There is a new project-specific role called manager, which has the following profile data: degree (not blank, shorter than 76 characters), an overview (not blank, shorter than 101 characters), list of certifications (not blank, shorter than 101 characters), and an optional link with further information."

- **TAREA 14:**

"Produce a UML domain model."

- **TAREA 15:**

"Produce an analisis report"

- **TAREA 16:**

"Produce a planning and progress report"

PRESUPUESTO

Tarea	Rol	Tiempo estimado (horas)	Tiempo dedicado (horas)	Coste (€/h)	Coste estimado (€)	Coste real (€)
T-02	Desarrollador	0.75	1.25	30	20	37.5
T-03	Desarrollador	0.75	2	30	30	60
T-04	Desarrollador	0.5	0.5	30	30	15
T-05	Desarrollador	1	0.75	30	20	15
T-13	Desarrollador	0.5	0.5	30	30	15

T-16	Jefe Proyecto	1	1	30	20	30
					265	192.5

CONFLICTOS

Tras realizar todas las tareas pertenecientes al entregable uno, he tenido conflictos al popular la base de datos desde un navegador diferente a Firefox. Resulta que el framework utilizado para estas tareas, no soporta usar otro navegador ajeno a este, al usar algunos tipos de atributos como resultó ser 'Date, o 'Money'.

CONCLUSIÓN

El entregable se compuso de 8 tareas, dos de documentación, 1 sobre análisis con diagramas uml y cinco de desarrollo, las cuales se completaron exitosamente en un tiempo de 7 horas. El coste de los trabajadores hace que el coste total descienda a 192.5€ en comparación a lo previsto antes de finalizar con esta entrega.

BIBLIOGRAFÍA

No procede.
